## TimePlace

You've arrived in a bustling metropolis, and now it's time to figure out what to do. If you're craving some sort of concert or live show, [TimePlace](#) (free on iOS) can help you find live music venues, opera, gallery openings, museum exhibits, festivals, and more. Tie it with your Facebook account, and the app maps out all of that day's events so you can clearly see your options and figure out if you can logically make it to all of them or not. You can save upcoming events (as "Tippys") and route out the directions beforehand, too.
